You can enable OData access to expose your domain model to any client application.

- **Platform:** N/A
- **Language:** C#
- **Download:** OData Tour

Problem

You'd like to use your DevForce domain model and business logic from a non-DevForce client application, such as a phone application.

Solution

See the walkthrough for a step-by-step discussion of how to expose your DevForce domain model as a WCF Data Service.
